Microsoft
| 17 Bulletins | 12 Critical | 5 Important | 14 User Targeted |

It may be summer in the part of the world where our Patch Tuesday team resides, but hackers don't take vacations, the patches keep coming, and we're in the trenches with the lowdown on patch priorities. In particular, you'll want to address a couple exploited zero days making the most of not only software bugs but also those pesky admin privileges we're always going on about. And as you get your patch updates well underway, make sure to read Microsoft's advisory on the new L1TF Meltdown and Spectre variant to keep ahead of possible attacks on that front.
